

RUSH uploader DMX-Tools

How to update the SW in the following products:

MH1

MH2

MH3

PAR1

STROBE

Start.

1. Download the RUSH Uploader tool from martin.com
2. Download the software for the product you need from martin.com
3. Unzip the software to a known location
4. Connect the Uploader to your PC using the USB cable
5. Connect the Uploader to your fixture using a 3 pin DMX cable.
6. You need to upload two files, select the V0.0 and upload it first
7. Select the Vx.x file and upload it
8. After updating the fixture remove the power for 20 seconds and reconnect.
