

LARGE BAND SYSTEM APP GUIDE

Large bands (5-10 members) have the unique ability to add a lot of color to a musical arrangement. With the core rhythm section (guitar, bass & drums) providing the backbone, a variety of different instruments & vocalists can be added to bring your band's music to a whole new dimension of sound. Without the proper sound system, those unique musical flavors can be lost in translation and even muddy up the most inspiring of songs.

Amplify your large band with the new Crown XLS DriveCore™ 2 amplifiers. This suggested system is perfectly matched using only HARMAN products paired with the latest and greatest Crown amplifiers. Don't ever let your music be misrepresented again. This is a professional sounding system that will give your band and your songs the justice you deserve. HARMAN wants to provide the full support for your musical expression and give you the proper tools you need to Be Heard.

Suggested Large Band System
