

# SMALL BAND SYSTEM APP GUIDE

Small bands (3-4 members) throughout music history have been known to make big impacts. The Jimi Hendrix Experience, Dion and the Belmonts, Green Day, Cream and Fun. are all 3-piece bands that made powerful musical statements. With very few members, it can be difficult to achieve a full sound, and every member is very exposed. A small band needs the support of a great sound system to effectively showcase their music.

Amplify your small band with the new Crown XLS DriveCore™ 2 amplifier. This suggested system is perfectly matched using only HARMAN products paired with the latest and greatest Crown amplifiers. Don't ever let your music be misrepresented again. This is a professional sounding system that will give your band and your songs the justice you deserve. HARMAN wants to provide the full support for your musical expression and give you the proper tools you need to Be Heard.

Suggested Small Band System
