Software Update Beta v1.0.7548 for the Soundcraft Ui12/16 Digital Mixers is Available Now!

This is to announce the availability of software release Beta v1.0.7548 for the Soundcraft 12/16 digital mixers. This release includes several major new features which provide significant workflow enhancements:

t = Tablet/Desktop user interface
p = Phone user interface
FW = Firmware enhancement to engine

- t: AFS retain status on boot
- t: Pin Master to Slide-out panel option
- t: Channel RTA on all outputs option (Settings)
- t: Offline import\export function (Includes Mute Groups)
- t: View Groups Global Set option
- t: Aux edit names (display correctly in SENDS and CH EDIT SENDS)
- t: Copy Aux sends functionality (COPY mix button AUX fader strips in AUX SENDS Page)
- t: AUX\FX sends LED Double click to set 0db
- t: Slide-out panel BPM tap blink indicator
- t: Channel strip color support
- t & p: Copy\Paste Gain params (SETTINGS)
- t & p: View Group ordering
- t & p: Chinese translation update
- t & p: Fonts, additional character support
- FW: New player core (Stability core replacement)
- FW: Added an additional FX processor (Ui12 only)

The new features represent probably the most powerful update package ever released in a single Ui software update, and add enhancements that streamline the workflow across a variety of different functions, all of them in response to customer feedback.

Bug Fixes & Improvements

In addition to the new features described above, a number of bug fixes and reliability improvements have also been made in the Beta v1.0.7548 release.

- t: Channel Strip LED redraw visual fix
- t: EQ page buttons layout fix
- t: Color update fix
- t: Syntax error fix
- t: 2-track file rename function
- t: AUX SEND Mute Group mask sync fix (Mute state when POST)
- t: FX PRE\POST and fixes on AUX\FX EDIT pages
- t: FX Edit page Pre\Post visibility fix
- t & p: Crash fixes
- p: Gain sync fix

Offline Editor

An updated version of the Ui online demonstrator application is also available incorporating the above bug fixes, and allowing pre-programming of mixer state that can be exported and imported to a hardware Ui12/16.

Where to get the software update

Downloads are now available on the Soundcraft website www.soundcraft.com.

From the Ui12/16 Upgrade product pages Scroll down the page to the 'Downloads' area and look under 'Software Updaters' and 'Other Software'.

Update Instructions

Please download and read any included Update Instructions before starting the update. If you experience any issues or problems with the upgrade, please contact customer services at soundcraft.support@harman.com.

Best regards,
